Elizaveta Tuktamysheva - Wikipedia
Heart of Algebra 201 In this question, you must create and solve an inequality. As in Example 1, let n be the number of years after 2014. Then the expression . 783 + 8. n. gives the number of miles of paved roads in County X . n. years after 2014. The question is asking when there will first be at least 1,000 miles of paved roads in County X.

Teacher to Teacher Ideas in the Top Teaching Blog | Scholastic
However, if the covariance matrix is not diagonal, such that the covariances are not zero, then the situation is a little more complicated. The eigenvalues still represent the variance magnitude in the direction of the largest spread of the data, and the variance components of the covariance matrix still represent the variance magnitude in the direction of the x-axis and y-axis.
