#3, the wiring harness on most of our columns exits the head of the column at 6:00 o'clock. It then arcs up and around where it exits the tube at 12:00 o'clock. So, do your best to avoid the underside of the top of the tube as well as the wire slot area. #4, try not to heat things up until it's cherry red. We suggest a series of spot welds.

Demystifying Holley Terminator and Sniper Ignition Hookup
The 4L80E is a computer controlled transmission and the successor to the TH400.. Identification of the 4L80E is pretty easy. If you use the process of elimination, there are only a few transmissions that it can be. The transmission itself has been around since 1991, and the case has changed a bit like the 4L60E/700R4 twins. The 4L80E is essentially a TH400 with an overdrive gear added.
