1. The core fallacies. Irving Copi's 1961 Introduction to Logic gives a brief explanation of eighteen informal fallacies. Although there is some variation in competing textbooks, Copi's selection captured what for many was the traditional central, core fallacies. [] In the main, these fallacies spring from two fountainheads: Aristotle's Sophistical Refutations and John Locke's An Essay ...

Argument. The word "argument" can be used to designate a dispute or a fight, or it can be used more technically. The focus of this article is on understanding an argument as a collection of truth-bearers (that is, the things that bear truth and falsity, or are true and false) some of which are offered as reasons for one of them, the conclusion. . This article takes propositions rather than ...
