The Munchkin cat or Sausage cat is a relatively new breed of cat characterized by its very short legs, which are caused by genetic mutation. The Munchkin is considered to be the original breed of dwarf cat.. Much controversy erupted over the breed when it was recognized by The International Cat Association (TICA) in 1995 with critics voicing concern over potential health and mobility issues.

Success with RecruitMilitary
In a Punnett square, the genotypes of the parents are placed on the outside. An uppercase letter is typically used to represent the dominant allele, and a lowercase letter is used to represent the recessive allele. The possible genotypes of the offspring can then be determined by combining the parent genotypes.
