The engine control unit switches off the exhaust gas recirculation system. In accordance with current legal requirements, engine power is reduced on vehicles that are equipped with NOx exhaust control. The fault code cannot be cleared while the fault is present. Check the electrical components, electrical connectors and wiring.

Scania Ecu Wiring Diagram

Pull out the multi-pin connector for the

engine control unit as well. Connect the welding clamp as close to the welding site on the component as possible. The welding clamp must not be connected to the engine, or so that the current can cross a bearing. When welding is finished: 1. Connect the alternator and engine control unit cables first. 2.

SOURCE: I need the wiring diagram This is the diagram for the fog lamps (headlamp is a different cell). If you are trying to add them to the existing wiring, do not expect the headlamp switch to cab fuse panel wiring to be there (that is usually what is missing when you can find the fog lamp connectors under the front of the truck).
