MLPs: INVESTMENTS THAT POWER AMERICA
A RIC-compliant fund, which includes 25% MLPs, would provide broader exposure to energy infrastructure, assuming the holdings in the other 75% are midstream corporations. A RIC-compliant product also tends to be more total-return focused, given that the 25% cap on MLPs results in a lower yield (read more on MLP access products).

MLP & Energy Infrastructure ETF
The AMZI Index is a composite of energy infrastructure MLPs and the AMEI Index is a composite of North American energy infrastructure companies with pass-through entities (MLPs) capped at 25%. The yield of the AMZI is clearly higher than the yield of the AMEI, and for perspective, the average yield difference over the last five years has been 195 basis points .

Pipelines vs. Power: Comparing Midstream/MLPs to Utilities
Summary. Since the challenging environment of 2014-16, the midstream space has spent the last few years improving its positioning for the next potential downturn, including reducing leverage, removing incentive distribution rights for MLPs, shifting to self-funding equity growth capital, and in some cases, right-sizing distributions.

Energy MLP Primer - Merrill Edge
There are several other small but notable factors that set midstream apart from utilities. In regard to rate regulation, the governmental agency responsible for interstate pipeline regulation, the Federal Energy Regulatory Commission (FERC), aims to support safe and efficient energy transportation while ensuring a just and reasonable rate of return to midstream operators ().
