Static and Kinetic Friction - Vernier

Experiment #12 from Physics with Vernier . In this experiment, we will use a Dual-Range Force Sensor to study static friction and kinetic friction on a wooden block. A Motion Detector will be used to analyze the kinetic friction acting on a sliding block.

Static and Kinetic Friction - Vernier

PWV #12: Use a Dual-Range Force Sensor to measure the force of static and kinetic friction. Determine the relationship between force of static friction and the weight of an object. Measure coefficients of static and kinetic friction for a particular block and track. Use a Motion Detector to independently measure the coefficient of kinetic friction and compare it to the previously measured value.
