Topology by James Dugundji - AbeBooks

Dugundji's book is short, modern, and impeccable. It covers every topic an undergraduate should know and even more. It is still useful for me after years of use. It exposes all important concepts of set topology and gives a short but focused introduction to algebraic topology. You won't regret to read it.

One might look at an arbitrary product of topological spaces (finite, infinite, or even not countable). The product topology has the same definition as in the finite case. The theorem of Tychonoff says that the product of topological spaces is compact if and only if each of the factors are compact. For more information and the proof see Chapt.
