

15 Microstrip Antenna International Journals Journal

Eventually, you will unquestionably discover a additional experience and realization by spending more cash. still when? realize you admit that you require to acquire those all needs in the same way as having significantly cash? Why don't you try to acquire something basic in the beginning? That's something that will lead you to comprehend even more in relation to the globe, experience, some places, once history, amusement, and a lot more?

It is your entirely own time to work reviewing habit. in the middle of guides you could enjoy now is **15 microstrip antenna international journals journal** below.

Ebooks are available as PDF, EPUB, Kindle and plain text files, though not all titles are available in all formats.

This paper presents design and simulation of a rectangular microstrip patch antenna at 6.5 GHz for wireless communications. This antenna has 140 MHz bandwidth, Return loss at centre frequency has less than -16.70dB. The beauty of this antenna is the use of single patch which make it easy to fabricate consequently cost of antenna becomes cheaper.

Rectangular Microstrip Patch Antenna For Wireless ...
This paper presents a flexible microstrip antenna that can be placed in contact with the human skin. The developed antenna is only 0.25 mm thick, has 32 mm x 31 mm dimensions, and 719 dB measured parameter at 2.45 GHz. A specific application of the antenna in microwave breast imaging is considered.

Abstract. Microstrip patch antenna is mostly used in modern communication devices over conventional antennas mainly because of their size. In this review paper a survey is conducted on commonly used techniques and design used in microstrip antenna papers which has been used by authors for designing of an efficient, low profile, small, compatible, affordable microstrip antenna, mainly used to ...

Abstract. To utilize the manipulation of wave properties by metamaterials, in this paper, a microstrip-fed patch antenna array, loaded with metamaterial superstrate, has been proposed. Under unloaded conditions, the conventional patch antenna array resonates at IEEE 802.16a 5.8 GHz Wi-MAX band with gain of 4.31 dBi and bandwidth of 425 MHz,...

In the paper 12mm by 15.6 mm rectangular patch antenna carved on FR4 substrate is presented. Both the simulated and the measured result show the operation of the antenna in the entire UWB range.

The antenna structure consists of a microstrip feed line connected to a rectangular patch. Then triangular split ring resonator unit cell is inserted on the ground of a traditional patch antenna that resonates at 15 GHz to produce additional resonance at 10 GHz.

RECTANGULAR RING MICROSTRIP ANTENNA: AN IMPACT ON WIRELESS ...
An antenna plays a major role in the field of communication engineering. In this paper we have designed a 12 sided polygon shaped patch Microstrip antenna and simulation has been done using IE3D simulator software version 14.0. The designed antenna

Microstrip Antenna - OMICS International
About this Journal. International Journal of Antennas and Propagation is a peer-reviewed, Open Access journal that publishes original research articles as well as review articles on the design, analysis, and applications of antennas, along with theoretical and practical studies relating the propagation of electromagnetic waves at all relevant frequencies, through space, air, and other media.

International Journal of Antennas and Propagation
As per available reports about 78 journals, 198 Conferences, 31 workshops are presently dedicated exclusively to Microstrip Antenna and about 1,700 articles are being published on the current trends in Microstrip Antenna. In terms of research annually, USA, India, Japan, Brazil and Canada are some of the leading countries where maximum studies related to Microstrip Antenna are being carried out.

DESIGN AND IMPLEMENTATION OF A CONFORMAL OMNIDIRECTIONAL ...
The antenna is a combination of circular patch and four capacitive feeds. By incorporating a cross-connected shorted conducting strip over the circular patch, the proposed antenna provides an enhanced impedance width of 65.4%, ranging from 1.46 to 2.88 GHz.
