Hi Folks, I am a new member. I own a 69 Coupe Deville. We had to remove the head to remove a broken exhaust manifold bolt!!! Now that is done but the Vacuum lines are I believe not 100% correct. My current config is in blue diagram. I also downloaded the correct diagram in blk/white from the web.

Vacuum Line Diagram 1966 Cadillac Deville

The one that goes down the firewall is to the EVAP canister. The EVAP canister is in the rear of the car on the driver's side, so that hose runs under the car for the length of the car. If it's off, it's a fire hazard because fuel vapor comes out of the hose where it ends, and you need to fix it. The missing hose won't cause the P1645.
