**Check your tire pressure either before you start your ride or the motorcycle has had a chance to sit for about 25 to 30 minutes. For accurate tire pressure readings always check pressure when the tire is cold, as heated tires can increase tire pressure. Buy yourself a high quality tire pressure gauge, not the cheap over the counter pocket kind.**

**2 Tire Pressure Control RDC Introduction RDC is an available option for the E65. The system monitors the tire inflation pressures, both when the vehicle is being driven and when it is stationary. An electronic transmitter module mounted inside each tire measures the tire pressure and temperature at regular intervals and transmits the information by radio frequency to the RDC control unit.**
