Speech sound disorder; Specialty: Speech-language pathologist: A speech sound disorder (SSD) is a speech disorder in which some sounds are not produced or used correctly. The term "protracted phonological development" is sometimes preferred when describing children's speech, to emphasize the continuing development while acknowledging the delay.

Speech sound disorder - Wikipedia

The Hata model is a radio propagation model for predicting the path loss of cellular transmissions in exterior environments, valid for microwave frequencies from 150 to 1500 MHz. It is an empirical formulation based on the data from the Okumura model, and is thus also commonly referred to as the Okumura-Hata model. The model incorporates the graphical information from Okumura model and ...
