A trapezoid is a
quadrilateral in which

exactly one pair of opposite sides is parallel. In the definition above, it's important to note the word exactly. If a quadrilateral has two pairs of parallel sides, it is not a trapezoid. Instead, it is called a parallelogram, which we'll learn about on another page.

pairs of parallel sides, you are then dealing with a parallelogram. So the one thing that you definitely can call this is a parallelogram. And I'll just draw it a little bit bigger. So it's a quadrilateral, and if I have a quadrilateral, and if I have two pairs of parallel sides. So the opposite sides are ...
