Lou, Have you had to work with this? Boeing Troubles: First It Was Fire, Now It's Ice By Alwyn Scott and Hideyuki Sano SEATTLE/TOKYO, Nov 23 (Reuters) - Boeing advisedairlines on Friday about a risk of engine icing problems on itsnew 747-8 and 787 Dreamliner planes with engines made by GeneralElectric, urging 15 carriers to avoid flying them nearhigh-level thunderstorms.

AERO - 787 No-Bleed Systems

A Japan Airlines Boeing 787-8 Dreamliner, operating as JL17 from Vancouver, Canada to Tokyo/Narita, Japan, was at 140 km east of Narita when the No.2 engine had to be shut down. Partial fan ice shedding resulted in fan imbalance that in turn caused substantial damage to the engine and an in-flight non-restartable power loss.

WING & ENGINE Anti-Ice systems! Explained by CAPTAIN JOE

The TKS Ice Protection System, manufactured by CAV Ice Protection, is a fluid-based ice protection system used to help aircraft safely exit in-flight icing conditions. The system uses a glycol-based fluid to cover the critical surfaces of an aircraft and prevent the risk of any ice forming on the leading edges of the wings.

UAL B787 Anti-Ice and Rain Flashcards | Quizlet

The all-electric architecture of the Boeing 787 aircraft requires that no bleed air is taken from the engine, but up to 500kW of power is extracted from each engine to drive the aircraft systems. 10:1 bypass ratio is the highest bypass ratio of any Trent, making it the quietest engine on the Boeing 787 aircraft today.

Incidents for aircraft type Boeing 787-8 Dreamliner ...

A Norwegian Air Boeing 787 plane was forced to turn around in Rome and make an emergency landing after engine failure caused hundreds of fragments to rain down on vehicles, homes and people below.

787 Engine Ice

The 787 engine therefore operates at a slightly higher rpm and temperature than the 747 engine, making it harder for ice to form.

Trent 1000 – Rolls-Royce

Ethiopian B788 at Hong Kong on Jul 18th 2019, loss of control on ILS approach (Published on 06.12.2019) An Ethiopian Airlines Boeing 787-8, registration ET-ASG performing flight ET-645 from Manila (Philippines) to Hong Kong (China) with 225 passengers and 10 crew, had been cleared for the ILS approach...

Higher Altitudes Cleared For GE-Powered 787, 747-8 In ...

The only remaining bleed system on the 787 is the anti-ice system for the engine inlets. While much can be said regarding the efficiency gains achieved by changing the means of extracting power for airplane systems from the engines, the 787's no-bleed architecture brings with it some significant maintenance cost and reliability advantages as well.

ANA Boeing 787 Dreamliner Suffers Dual Engine Failure On ...

The 787 does not use any bleed air from the engines. Hydraulics systems, wing anti-ice, air conditioning and pressurization are electrical powered. Available engine options for 787-9: Rolls-Royce Trent 1000-A2, 1000-J2, 1000-K2, General Electric GENx-1B74, -1B75P2.
