While both provide adequate results, the Loup Electronics Elite Yield
Monitor utilize the optical sensor. This is a tried and proven sensing
technology that can be found on thousands of combines worldwide and in
OEM Yield Applications. The optical sensor has two major advantages
that reduce the amount of time and effort involved in Calibration:

John Deere has also changed the monitor bracket tray with a fresh design that lets the operator position the tray how and where they want. Mounted on top or on the bottom. The new tray kit (BRE10142) includes adjustable mounting legs that allow the tray to be attached and positioned anywhere along John Deere monitor brackets.

John Deere 9500 Combines For Sale New & Used | Fastline

"For example, with Deere combines, I advise starting at 400 rpm and adjusting from there," say John Deere's Hawk. "We are harvesting so much more crop (both yield and residue) today. The slower threshing speeds of the past are not fast enough to consume the crop."
