Psycholinguistics

A Dynamic Model of Multilingualism is an innovative, challenging, and stimulating book about multilingual development. Herdina and Jessner apply aspects of systems theory (also known as chaos theory) to model multilingual development, that is the growth and decline of individual language systems in contact.

Perspectives Of Change In Psycholinguistics

This book provides a novel approach to multilingual phenomena as discussed in psycholinguistic research, drawing together (second) language acquisition theory, bilingualism research, and dynamic systems theory.

A Dynamic Model of Multilingualism:

Perspectives on Change ...

Theories from DMM are models whose empirical claims are rather weak Provide a helpful model with the intention of enabling us to think about multilingualism in a much more coherent and cogent way Humans are complex biological systems, therefore should be analysed

A Dynamic Model of Multilingualism | Request PDF

A Dynamic Model of Multilingualism aims to capture the dynamic relationship between the different variables present in multilingual acquisition (and loss). In particular, the DMM is designed to identify key threshold phenomena, on the basis that qualitative changes come about when a certain threshold value is exceeded.
