In this section, we discuss one of the most fundamental concepts in probability theory. Here is the question: as you obtain additional information, should you update probabilities of events?

Logistic Regression: Calculating a Probability

Probability is a measure quantifying the likelihood that events will occur. Probability is a number between 0 and 1, where, roughly speaking, 0 indicates impossibility and 1 indicates certainty. The higher the probability of an event, the more likely it is that the event will occur.
