When Stomach Pain Is and Is Not an Emergency

Pay attention to your gut-brain connection – it may contribute to your anxiety and digestion problems. This connection goes both ways. A troubled intestine can send signals to the brain, as a troubled brain can send signals to the gut. Therefore, a person's stomach or intestinal discomfort can be the cause or the product of anxiety, stress, or depression. That's because the brain and gastrointestinal (GI) system are intimately connected.
