Using SVG | CSS-Tricks

Starlink satellites are small and there is an incredible amount of space around the Earth. In addition, the constellation is designed in a way to minimize the risks of creating space debris: Starlink satellites have their own engines and are able to avoid a possible collision with other objects, whether they're another satellite, a piece of space debris or a non-functional Starlink satellite.

In the Blinn-Phong shading model (as opposed to the Phong shading model), we replace with  $\hat{v}$ , where the half-vector is computed by: (i.e., the normalized sum of the view and light vectors). Note that while this is considered an approximation, it has been found that the Blinn-Phong model more accurately reproduces lighting for many types of real-world materials.
