Rural definition of health: a systematic literature review

This systematic review aims to assess reasons for current providers' geographic choices and the success of training programs aimed at increasing rural provider recruitment. This systematic review (PROSPERO: CRD42015025403) searched seven databases for published and gray literature on the current cohort of US rural healthcare practitioners (2005 to March 2017).

Rural Healthcare Workforce: A Systematic Review

The aim of this research is to use a systematic evidence review to increase the understanding of the economic, social and environmental impacts of strengthened LTS on rural people. Unlike other systematic reviews, this review is informed by an organisation-specific theory of change that covers a broad set of potential causal chains around LTS and related outcomes and impacts.
