*A Theory of Fun for Game Design is a book written and illustrated by Raph Koster. It is based upon a presentation Koster gave at the Austin Game Conference in 2003, [1] and the book reflects its origins by displaying text on one page and a cartoon/graphic from the talk on the other page.*

*Review: A Theory of Fun for Game Design by Raph Koster*

*Theories are dry and academic things, found in thick books at the back of the library, whereas fun is light, energetic, playful and... well... fun. For the first few decades of interactive game design we were able to blithely ignore many of the larger meta-questions surrounding our craft while we slowly, painfully learned to walk.*

*A Theory of Fun for Game Design - Wikipedia*

*You may imagine my surprise, then, to find that Ralph Koster's A Theory of Fun for Game Design is extremely concerned with the intersection of learning and fun; in fact, his "theory of fun" even holds that fun and learning are inextricably intertwined. He builds his case by examining some of the peculiarities of the human brain, for example, the release of pleasurable chemicals in the brain at the "moment of triumph when we learn something or master a task."*
