The American Architectural Manufacturers Association (AAMA) 2605 Standard is the highest standard for superior performing organic coatings on aluminum extrusions and panels. The AAMA 2605 Standard assists the architect, owner, and contractor specify and obtain factory-applied organic coatings that will provide and maintain a superior level of performance.

Comparison of Architectural Specifications
AAMA 2605 - the specification for high-performance exteriors Ten years after it has been

Online Library Aama Standard 2605 13

applied, an AAMA 2605 paint will have faded no more than 5 Delta E, the chalking will be no higher than 8, 50% of its gloss will still be retained and only 10% of the film will have eroded.

User Guide

The AAMA's rigorous 2605-13 testing performance standards for Superior Coatings include more than 2,000 hours of prohesion (cyclic corrosion) exposure, 4,000 hours of humidity resistance, and a variety of physical property and chemical resistance testing. AAMA standards also require that the coating maintains specified standards of film
