Investigate how adding more of a liquid or diluting with water affects pH. Sample Learning Goals Determine if a solution is acidic, basic or neutral; Place acids or bases in order of relative acidity or basicity ; Relate liquid color to pH; Predict how solution volume or dilution with water will affect the pH of acids or bases

8: Acid, Bases and pH (Experiment) - Chemistry LibreTexts

Acids produce protons or the H⁺ ion while bases accept protons or generate OH⁻.Alternatively, acids may be viewed as electron pair acceptors and bases as electron pair donors. Here are ways of defining acids and bases, acids and bases and sample calculations.

SIMULATIONS - CHEMISTRY : ACIDS and BASES

Test the pH of things like coffee, spit, and soap to determine whether each is acidic, basic, or neutral. Visualize the relative number of hydroxide ions and hydronium ions in solution. Switch between logarithmic and linear scales. Investigate whether changing the volume or diluting with water affects the pH. Or you can design your own liquid!
