Evens skin tone: It inhibits tyrosinase, which is an enzyme that leads to pigmentation. It's effective on post-inflammatory hyperpigmentation from acne breakouts and can possibly have an effect on melasma as well. Treats rosacea: Azelaic acid could help with pore-clogging, inflammation, and secondary infections caused by rosacea. "It's a less irritating option, which is why we use it for rosacea because the skin tends to be very sensitive," Gerstner says.
