CLINICAL PRACTICE GUIDELINE FETAL GROWTH RESTRICTION ...

Small-for-gestational age (SGA) refers to an infant born with a birth weight less than the 10th centile. Small fetuses are divided into normal (constitutionally) small, non-placenta-mediated growth restriction (for example: structural or chromosomal anomaly, inborn errors of metabolism and fetal infection) and placenta mediated growth restriction.

Fetal growth restriction Clinical Practice Guidelines

Fetal factors were defined as contraindications that can affect the safety of the fetus or affect the procedure of ECV by fetal characteristics.

Results Guidelines. The electronic search yielded three international guidelines on ECV (6-8). Furthermore, there are two Dutch guidelines on the topic (9, 10).

Contraindications for external cephalic version in breech ...

CLINICAL PRACTICE GUIDELINE FETAL GROWTH RESTRICTION 5 1.20 In cases of isolated FGR (EFW <10th centile and normal UA Doppler), delivery can be delayed until at least 37 weeks, and even until 38-39 weeks gestation.
