Addiction and Choice: Rethinking the relationship: Amazon ...

Most accounts of addiction either see it as a disease, and hence outside the addict's control, or else as involving chosen behavior, and hence within the addict's control. Contrary conclusions about responsibility are held to follow. We argue that this involves a false dichotomy. There is good evidence that addiction does involve a pathological decoupling of wanting and liking—addicts ...

An opposing tradition, which finds current support among scientists and scholars as well as members of the general public, is that so-called addictive behavior reflects an ordinary choice just like any other and that the concept of addiction is a myth.

Rethinking addiction | The Psychologist

That is, the correlates of quitting are the correlates of choice not compulsion. However, addiction is, by definition, a disorder, and thereby not beneficial in the long run. This is precisely the pattern of choices predicted by quantitative choice principles, such as the matching law, melioration, and hyperbolic discounting.
