Adobe - Support : ColdFusion Updaters, Patches, and Hot ...

We started with a working instance of Windows Server 2007 R2 using IIS 7 with Coldfusion 9 Enterprise Edition installed that hosts multiple sites (in fact its still currently running now). Made an exact copy of it to a new instance. It worked just as the old one did though we could only run each site through localhost as the old domains have not been transferred over to point to the new server.
