This organic chemistry learning object allows you to work through a set of spectroscopy problems using an interactive drawing tool. After each attempt, your structure is assessed and you are given feedback to help you work towards the solution. Hints are available in many cases and worked solutions are provided.

### SOLVED PROBLEMS IN ADVANCED ORGANIC SYNTHESIS

It is the mission of this project to provide access to problems that we have created in conjunction with our teaching activities in advanced courses in organic chemistry and chemical biology. If the first phase of this undertaking proves to be successful, we will expand the site to include problems encountered in introductory courses as well.
