We are not focusing only on foreign tourists as even local Africans get some of these animals confused! Correct animal identification is important so here are the animals - predators and prey - most commonly confused by visitors to African game reserves and national parks:

### African Elephant - Species Survival Network

Identifying elephants isn't difficult, but it requires using powers of observation and it takes a bit of practice. There are many different

characteristics that you can use to identify an elephant: sex; body size; shape; length and configuration of the tusks; size and shape of the ears; ear venation patterns; notches, tears, holes in the ears.

Animal Identification | Wildlife Guide | African Bird ...

The African elephant is the largest living land mammal. An elephant can weigh 6 - 7 tons and has no natural enemies. An elephant drinks up to 160 liters of water per day. An African elephant possesses such "manual" dexterity in his/her trunk tip that he/she can actually turn the pages of a book with it.

Second Meeting of the African Elephant Coalition

Africans Speak African If you have travelled overseas from the continent, there is a likelihood that you have met someone who has asked you to teach them to speak 'African.' Not once have I faced this misconception, and the first time this happened to me, I thought I had misunderstood the request and asked if my new friend meant Swahili, as that is the language spoken in my country.
