bol.com | Scrum, (Mega Pack), for the Agile Scrum Master ...

But responsibilities can shift a bit when team makeups and practices shift. For instance, if the team isn't doing Scrum (say, they're doing kanban or something else), the product manager might end up doing the prioritization for the development team and play a larger role in making sure everyone is on the same page.

Scrum, (Mega Pack), For the Agile Scrum Master, Product ...

First, you couldn't do Agile without adopting the Agile Process, which in Mega-Bureaucracy-speak meant "we're doing a very specific flavor of scrum". This meant morning standups were mandated. You needed a scrum-master on the team, which would be a resource drawn from the project management office, and well, they'd also pull double duty as the project manager.

The book describes a broad range of agile product management practices, including making agile product discovery work, taking advantage of emergent requirements, creating the minimal marketable product, leveraging early customer feedback, and working closely with the develop

Mega-Agile - The Daily WTF

You don't have a true product owner. When product managers, for example, take on the role of their agile team's product owner, they often find it just doesn't work. In a Scrum, agile product management environment, the product owner's responsibilities are important and time-consuming enough that it should be a standalone role.
