Botany - Wikipedia

Botany is regarded as a broader, pure science in regards to living plant organisms, from the smallest bacteria to the largest trees. Horticulture, on the other hand, is an applied science under that umbrella and focuses solely on edible and ornamental plant life.

Agricultural Botany

Agricultural Plant Biology focuses on plants used for cover-crops, food, fiber, fuel and turf. The program has a strong research emphasis on plant responses to both abiotic and biotic stresses, reproductive biology at the level of the gene to the crop production system, and breeding for enhanced yield in a resource-limited environment.
