File Type PDF Agriculture Science In Mughal Period Its Socio Economic

Indian agriculture began by 9000 BCE on north-west India as a result of early cultivation of plants, and domestication of crops and animals. Settled life soon followed with implements and techniques being developed for agriculture. Double monsoons led to two harvests being reaped in one year. Indian products soon reached the world via existing trading networks and foreign crops were introduced ...

to produce works of unusual quality and refinement such as the Taj Mahal, in Agra.

The mughal empire : Paintings and Music

Although each classic period Mughal ruler was the son of his predecessor, the succession was by no means one of primogeniture—the eldest did not necessarily win his father's throne. In the Mughal world, every son had an equal share in his father's patrimony, and all males within a ruling group had a right to succeed to the throne, creating an open-ended, if contentious, system.
