What are the Quality Core Tools The Quality Core Tools are defined as five supplemental techniques and/or methods which support the expectations of IATF 16949. These tools are documented separately through the publication of five manuals available through Automotive Industry Action Group (AIAG).

IATF 16949 Five core tools – What are they?

What are Core Tools? Quality Core Tools are a group of problem solving skills the AIAG requires to evaluate and improve your Quality Management System (QMS). There are many statistical tools used to solve problems, but the AIAG has determined that the five tools below are a core requirement for evaluating your QMS. If your company is seeking certification to IATF 16949, your Internal Auditors will need to be competent (and prove it) in these core tools in order to meet the requirements.
