The Airbus C295 is a new-generation tactical airlifter in the light and medium segment. It is robust and reliable but also highly versatile in terms of the number of different missions it can perform. The C295 conducts multi-role operations worldwide under all weather conditions. It is fully certified and routinely operates day and night in combat missions in all weather extremes, from desert to high altitude.

C295 | Airbus

The flight model has been overhauled to function better with the new Auto Pilot systems and it is a pleasure to fly the aircraft manually. Of course all the standard protections (in pitch, bank and speed) are included. General: Simulation of the Airbus A320 and A321 focused on the day to day operation of the aircraft from the left seat

Air Transat Flight 236 was a transatlantic flight bound for Lisbon, Portugal, from Toronto, Canada, that lost all engine power while flying over the Atlantic Ocean on August 24, 2001. The Airbus A330 ran out of fuel due to a fuel leak caused by improper maintenance. Captain Robert Piché, 48, an experienced glider pilot, and First Officer Dirk de Jager, 28, glided the plane to a successful landing at a remote airstrip in the middle of the ocean.
