Airguide Restoration / Repair Parts - Classic
A barometer measures air pressure and can forecast the weather within a 12 to 24 hour period. Air pressure can be measured in inches of mercury, millimeters of mercury, or hectopascals, depending on where you live and the gauge on the instrument. In order to tell whether air pressure is rising or falling, you must calibrate the barometer correctly.

Airguide Marine Clock - Cottage Clock Shop LLC
They made barometers and thermometers for the home market under the trade name Airguide. In 1956 Dick Fee sold his interest in the company and the name was changed to Airguide Instrument Company. In 1980 Airguide filed for bankruptcy protection, and was subsequently sold to the Johnson Wax Company.

Aneroid Barometer workings take 2
This Airguide hygrometer probably dates from the 1950s. It uses a metal-paper sensor coil directly connected to the indicator needle. The coil consists of a salt-impregnated paper strip attached to a metal coil. As the paper strip absorbs or releases moisture it causes the metal coil to wind/unwind, much like a bimetallic thermometer coil.
