Chapter 3 Airport Design Standards and Runway Length

Well judging from the most efficient high volume airport there is in terms of reduced delays, it would be LAX with a midfield terminal setup between two sets of runways. This is the same setup as ATL and the same general set up as DFW. DEN has a design so that all planes land towards the terminal and takeoff away from the terminal in a swastica style layout that is supposed to reduce taxi

SEATTLE-TACOMA INTERNATIONAL AIRPORT DESIGN GUIDELINES

Airport Terminal Design: What Works Best? - Airliners.net

The new Pan American Terminal at New York (Kennedy) Airport reputedly cost more than \$140 million. An airline could go broke on terminals alone! We should, therefore, give careful consideration to the kind of terminal we build. Unfortwiately, airport planners have tended to think simplistically about the design of terminals.

DESIGNING THE AIRPORT TERMINAL

King County International Airport-Boeing Field (FAA LID/IATA: BFI, ICAO: KBF1) is one of the nation's busiest primary non-hub airports. The airport averages 200,000 takeoffs and landings each year, and supports \$3.5 billion in local business. This in turn supports more than 16,000 jobs, creating \$2 billion in labor income in King County.
