Almost Everyones Guide to Science book by John Gribbin

John Gribbin is one of the few science writers who is equally comfortable writing about biology as he is about physics, and this beginning will take the reader through the basics and the fundamental issues of the crucial areas of modern science, from the birth of the universe to the evolution of our own species, the nature of human behaviour and the workings of our minds. Crucially, the book will not only provide an overview of the central areas in a single volume, but will ...
