Curtain Wall Fundamentals | Glass Magazine
Curtain wall systems are non-structural cladding systems for the external walls of buildings. They are generally associated with large, multi-storey buildings . Curtain walls separate the interior from the exterior , but only support their own weight and the loads imposed on them (such as wind loads , seismic loads , and so on) which they transfer back to the primary structure of the building .

Curtain Wall Systems - Arconic

A curtain wall system is an outer covering of a building in which the outer walls are non-structural, utilized only to keep the weather out and the occupants in. Since the curtain wall is non-structural, it can be made of lightweight materials, thereby reducing construction costs. When glass is used as the curtain wall, an advantage is that natural light can penetrate deeper within the building.
