In evolutionary biology, abiogenesis, or informally the origin of life (OoL), is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but an evolutionary process of ...

That there are race, gender, and age vulnerabilities within the domain of employment should hardly come as a surprise to sociologists. Classic work in the field (e.g., Dubois, Addams, Weber, etc.), of course, stressed the hierarchical, status bases of social exclusion, and more recent and general streams of empirical work have clearly pointed to the consequences of status generalization for ...
