An International System for Human Cytogenetic Nomenclature ...

International human rights law (IHRL) is the body of international law designed to promote human rights on social, regional, and domestic levels. As a form of international law, international human rights law are primarily made up of treaties, agreements between sovereign states intended to have binding legal effect between the parties that have agreed to them; and customary international law.

An International System For Human

One of the aims of the International System for Human Cytogenetic Nomenclature (ISCN) 1 is to prevent confusion in reporting research cytogenetics results. In this context, Massey et al 2 apparently overlooked the ISCN recommendations and their cytogenetic results were reported out of the proper form.
