The LD-50 rating indicates at what dosage fifty percent of test animals receiving a drug will die as a result of drug induced toxicity. A number of researchers have attempted to determine marijuana's LD-50 rating in test animals, without success. Simply stated, researchers have been unable to give animals enough marijuana to induce death. 8.

About: Our Six Cosmic Principles – Dr. Bronner's

N,N-Dimethyltryptamine (also known as DMT, N,N-DMT, Dmitri, and "The Spirit Molecule") is a classical psychedelic substance of the tryptamine class.[1] Despite being one of the simplest psychedelic compounds, it is known for its unique ability to produce short-lived but intense visionary states and complete hallucinations. It is thought to produce its psychedelic effects by binding to ...

An Animal 's Place By Michael Pollan The New York Times Magazine, November 10, 2002. The first time I opened Peter Singer 's " Animal Liberation, " I was dining alone at the Palm, trying to enjoy a rib-eye steak cooked medium-rare. If this sounds like a good recipe for cognitive dissonance (if not indigestion), that was sort of the idea.

Animal rights is the philosophy according to which some, or all, animals are entitled to the possession of their own existence and that their most basic interests—such as the need to avoid suffering—should be afforded the same consideration as similar interests of human beings. That is, some species of animals have the right to be treated as individuals, with their own desires and needs ...
