AutoCAD: Annotation Scaling in Drawings - lynda.com

The annotation scale determines how many drawing units in the drawing represent one inch (for imperial drawings) or one millimeter (for

metric drawings) in the plotted drawing. A drawing scale of 1/8"=1'-0" (or 1:96 - eight eighths per inch times 12 inches per foot) in a drawing that has inches as default drawing units means that 8 feet in the drawing are represented by 1 inch on the ...

Smarter Drawings with Fields, Attributes and Document ...

Labels are scaled relative to the drawing scale in model space, and are scaled to the assigned text height in paper space, regardless of the viewport scale. Model space scaling In model space, label text height is controlled by the drawing scale and the text height as specified in the label style. For example: In a 1:50 scale drawing, with the label text height 0.1, the labels are created at a ...

AutoCAD Scale Drawing Without Changing Dimensions ...

I know how to do it to individual dimensions but not to the whole drawing. B) I changed the "Scale" of my Drawing in "Sheet Properties", but for every drawing I create I need to redo it. How do I keep it constant so I won't have to redo the scaling every time? Greg Hynd May 3, 2016 4:47 AM.

2012 SOLIDWORKS Help - Annotation Properties

I have a drawing with several layouts, and in one particular layout only, I want the text to be smaller than the annotation scale would dictate (the viewport is 1"=300', but I want the text to display at 1"=50' annotation scale). I tried selecting the viewport and changing the "annotation scale" p...
