One Answer to Cancer

A super fun experiment we found on KidScienceApp is extracting DNA from strawberries.. DNA is the “blueprint” for all organisms. It can be found in the nucleus of the cell. To get to the DNA, the cell wall needs to be broken down and the DNA needs to be separated from the rest of the cell.

Afro-Brazilians - Wikipedia

Each of the approximately 10¹³ cells in the adult human body has its own copy or copies of the genome, the only exceptions being those few cell types, such as red blood cells, that lack a nucleus in their fully differentiated state. The vast majority of cells are diploid and so have two copies of each autosome, plus two sex chromosomes, XX for females or XY for males - 46 chromosomes in all.

Oprah.com

The first system referred by Telles is that of the Brazilian Institute of Geography and Statistics (IBGE). In the Census, respondents may identify their ethnicity or color from five categories: branca (white), parda (brown), preta (black), amarela (yellow) or indígena (indigenous). The term parda needs further explanation; it has been systematically used since the Census of 1940.
