flashcards, games, and other study tools.

AP Biology Lecture Notes - Mrs. Chou's Classes

Introduce the concept of unity and diversity of life. There are so many varieties of organisms and, yet, the cell is the basic unit of life. The fundamental structures and life processes of cells are similar; but, how these cells are utilized in different organisms is hugely varied and reflects adaptation of the organism to its environment.

AP Central for Education Professionals | College Board

It is an artificial method that introduces DNA into the cells of the human body. The first gene therapy was successfully accomplished in the year 1989. The simple process of gene therapy is shown in the figure below: In the figure, the cell with the defective gene is injected with a normal gene which helps in the normal functioning of the cell.
