API 17D : 2011 Superseded View Superseded By Superseded A superseded Standard is one, which is fully replaced by another Standard, which is a new edition of the same Standard.

### antaresoffshore.com

On this page you will find API Spec 6A and API Spec 17D Flange information, dimensions, and a method of Flange identification. Included, you will find a chart comparing old API Series Flanges with many ANSI Flanges and current API Flanges. You can easily obtain Flange bolt sizes, bolt torque, and ring gasket numbers.

### API 17D : 2011 | DESIGN AND OPERATION OF SUBSEA PRODUC ...

This edition of ANSI/API Specification 17D is the identical national adoption of ISO 13628-4, Design and operation of subsea production systems-Part 4: Subsea wellhead and tree equipment.

### Api 17d Standard

1.1.4 API Specification 17D – Annex M.3 PSLs are defined in 5.2 and 5.3, and in ISO 10423. PSLs apply to pressure-containing and pressure-controlling parts and assembled equipment as defined in this part of ISO 13628. Determination of the PSL is the responsibility of the purchaser.

### API SPEC 17D : Design and Operation of Subsea Production ...

parent standard (API 17D) are not covered in this specification, there are no supplementary requirements or modifications to the respective clause. The terminology used within this specification follows that of the parent standard and otherwise is in accordance with ISO/IEC Directives, Part 2.

### API Specificaiton for Subsea

Standard Test Method for Density or Relative Density of Light Hydrocarbons by Pressure Hydrometer(ASTM D1657) 4 : X : COPM : Ch. 9.3: Standard Test Method for Density, Relative Density, and API Gravity of Crude Petroleum and Liquid Petroleum Products by Thermohydrometer Method(ASTM D6822) 4

### API RP 17H - Techstreet

API 17D = BX type. After assembly, API flanges fitted with R type ring grooves stand off from each other. API Flanges fitted with BX type ring grooves meet face to face with no stand-off. For API flanges fitted with R type ring grooves, Oval type or Octagonal type gaskets may be used. For API flanges used subsea, gaskets must be drilled with a pressure release hole to prevent hydraulic locking and their name pre-fixed with an 'S', i.e. SR or SBX.
