This all boils down to context: A user interface needs to be designed for specific users, goals, and tasks. Guidelines may be a reasonable starting point, but they are only a starting point. The value in UI consistency lies in effective learning, by making it easy to transfer knowledge from another product without interfering with ease of use.

Your own apps should enhance the user's perception that hardware and software are indistinguishable. Personal communication. Because Apple Watch was designed to be worn, its UI is attuned to the user's presence. No other Apple device has ever been so closely connected to the user. Be mindful of this connection during the design process.
