STA 13D - Department of Statistics

We will develop multivariate extension of t-tests and analysis of variance procedures. Since these extensions are based on the multivariate normal distribution, we will briefly explore properties of the multivariate normal distribution. We will explore ordination techniques for selecting low dimensional summaries of high dimensional data.

STA 437 / 1005 - Methods for Multivariate Data

sical"multivariate methodology, although mention will be made of recent de-velopments where these are considered relevant and useful. But there is an area of multivariate statistics that we have omitted from this book, and that is multivariate analysis of variance (MANOVA) and related techniques such as Fisher's linear discriminant function ...
