This human-machine interface can also be used to teach in complex production processes, i.e. guided set-up. This allows you to program your ALLROUNDER much more efficiently with a minimum of effort.

Injection moulding machines - ARBURG Hi, having a problem with Arburg 420V 1000-350. Machine was powered off and will not inject now. Mould closes, carriage comes in, nozzle is in location. But when machine switches to injection we get time out alarm. Have checked plugs for 24v and that solenoids energise, all ok. Neither injection unit will inject. Can purge in manual on both injection units.
