Also included is the balance of plant piping beyond the block valve(s) that defines the boundary of the boiler, the rules of which fall entirely within the scope of the B31.1 Power Piping Code. Charles distinguishes this Code from Process Piping, the ASME B31.3 Code, as well as from other B31 Codes.

ASME B31.1, Power Piping Code, prescribes requirements for the design, material, fabrication, erection, test, and inspection of power and auxiliary service piping systems for electric generation stations, industrial and institutional plants, central and district heating plants, and district heating systems. It does not apply to piping systems covered by other sections of the Code for Pressure ...

Power Piping - Brown Technical

Non-boiler external piping falls entirely within the scope of ASME B31.1. Thus, boiler external piping is treated as part of the boiler and subject to the Boiler and Pressure Vessel Code, whereas non-boiler external piping is not.

Notes: 1) ASME B31.1 is written similar and it stays parallel with Section I of the ASME B&PV Code on most issues. 2) ASME B31.1 & ASME B31.3 ,both Codes spell out their intended scopes and their rules are "valid" for the intended scope. ASME B31 Pressure Piping Codes are "voluntary consensus Codes".
