If you have source code, import first then auto-create a Class diagram. – How to import Java source code – Use Plug-ins to import source code (C++, C#, and Java) Right-click on a package in a tree view and select [Auto Create Class Diagram] Then a class diagram will be generated automatically.

**Astah Pro FAQs | Astah**

State Transition Paths serve to monitor and predict the actual behavior patterns of the software that you are modeling. With Quality Suite, Astah extracts state transition paths directly from State Machine diagrams. It then generates a test case which displays the connections and checks your models to assure that they correctly reflect the software's true behavior.

If the pop-up below opens restart Astah. The [Plugin] menu exists in Astah version 7.2 or later. If you are using v7.1 or earlier, read this FAQ. If you see the [State Transition Table] window below the diagram editor, the installation is complete! If there is no window below the diagram editor, go to [View] - [Show/Hide Extra View] to open.

**Astah Quick Start Tutorial**

Reference: Astah Professional Reference Manual - 34. Exporting Java (P.359) 2. Add {ordered} constraint to the Association End Add {ordered} constraint to the Association End. Checking the option above will use Collection Class instead of Array, however it will not use List unless {ordered} is added. Hope this helps.
